Smart Phone based secure, HIPAA compliant, structured texting platform for Physicians and Nurses to collaborate effectively, make informed decisions, leading to connected care and enabling the healthcare continuum in Hospitals, Physician Groups, Skilled Nursing Facilities, Assisted Living, PACE programs and Home Health.

Physicians can configure structured checklists for Nurses to mimic their train of thoughts on assessments while Nurses can configure templates for standard workflows, thus minimizing errors and delivering quality.

- Improve your hospital's communications and stop making patients pay the price for communication failures – (30% of malpractice lawsuits)
- Hospitals need a complementary system to the EHR that enables messaging and collaboration among all members of the care team to support the real-world communication needs of physicians & nurses
 - Care team coordination: Manage communications involving patient handoffs, admission requests, information exchanges amongst team
 - Situational awareness of key events: Make sure the right team member is informed of patient events with actionable information and accountability
- TriageSTAT structured messaging mimics the Physician's train of thoughts to minimize errors and frequent training/in-service

- Leveraging technology for connected care across hospitals, physicians and SNF care givers is needed to address the upcoming healthcare continuum
- Ineffective communication is the root cause for 66% of medical errors. Improved texting, access, productivity results in better care outcomes
- Physicians have ability to configure structured checklists for Nurses to mimic their train of thought to improve efficiency and minimize errors
- Nurses have the ability to create checklists for common workflows like admission, discharge etc to improve efficiency and minimize errors
- Unlimited user licenses & support per facility for a fixed annual price
